

Talcor Complex HD 23

Product Description

TALCOR Complex HD 23 is high temperature Heavy Duty Grease which comprises a shear stable lithium complex soap and highly refined base oils which are fortified with Talcor's unique additive package.

Customer Benefits

- Wide variety of applications and temperature range thus reducing inventory costs and product misapplication.
- Superior EP properties reduce wear and extend component life thereby reducing maintenance cost and downtime.
- The Molybdenum Disulphide provide a natural positive affinity to all metal surfaces to ensure lubrication during frequent start ups, slow speeds or heavy loads.
- Bonding and cohesive properties provide superior lubricant retention in bearings and bushes.
- Designed for self-sealing protection, to keep lubricant in and contamination out.
- Good pumpability over a wide temperature range i.e. can be dispensed by conventional automatic systems where required.

Applications

Heavy duty plant lubrication, ball and roller bearings, pins & bushings, chassis, slides, and ways where temperatures and loads are high and/or operates in a wet environment which requires tenacious sealing whilst not compromising pumpability. Typical industries are Mining, Cement, Steel, Sugar, Construction and Transport.

Always confirm that the product selected is consistent with the original equipment manufacturer's recommendation for the equipment operating conditions and customer's maintenance practices.

A **Chevron** company product

Typical Properties

NLGI Grade	2
Product Code	571417
Thickener	Lithium Complex
Dropping Point °C	230+
Base Fluid Viscosity@ 40°C (cSt)	320
Safe Operating Temperature °C	150
Four Ball EP Test Weld Point (kgf)	500
